

## HCL AION

Release Type – Fix Pack  
Release Version - 2.1.1  
Release Date – January 30<sup>th</sup> 2026

HCL AION 2.1.1 is a maintenance (fix pack) release focused on improving platform stability, resolving reported defects, and addressing security vulnerabilities. This release also activates UI support for exporting models in ONNX format to enhance interoperability and deployment flexibility.

## Key Highlights

### Bug Fixes

- Resolved multiple defects reported in earlier versions.
- Fixed issues impacting model training workflows and runtime stability.
- Addressed UI inconsistencies in select screens.
- Improved error handling and logging for better diagnostics.

### Security Enhancements

- Remediated identified security vulnerabilities.

### Feature Activation – ONNX Model Export

- Enabled the UI capability to export trained models in **ONNX (Open Neural Network Exchange)** format.
- Improves interoperability with third-party ML frameworks and inference engines.
- Facilitates portability across different deployment environments.

### Compatibility

- Fully compatible with HCL AION 2.x.x environments.
- No breaking changes introduced.
- Upgrade is recommended for all 2.x users.
