Chapter 1. Overview

Traditional BigFix Patch content focuses on a limited set of vendors with a specialty in operating system and security patching. The Updates for Windows Applications – extended content site, provides coverage for upgrades to a growing list of third-party applications. This expansion helps you fill gap in proactive patching processes.

Through relationships with these vendors, HCL's content development teams ensures that Fixlets are produced to quickly detect installations of older versions of supported applications and provide the help IT operators facilitate in-place upgrades through their normal patching cycles.

Enabling updates for the Windows Applications - extend content site

You must have access to Compliance or Lifecycle domain in BigFix console.

Perform the following steps to enable Upgrades for Windows Applications Extended from BigFix console:

1. Click **Licence Overview** on the BigFix Management navigation tree.

2. Click the **Compliance** or **Lifecycle** domain on the Licence Overview dashboard.
