## Included in this report

---

This report can be generated with filters applied to operating system platforms, components, and/or software capabilities. This section reflects how the report was filtered when it was generated.

### Legend

- The information about this item is included in this report.
  - The information about this item is not included in the report filter.
- 

### Platforms

- AIX
- Linux
- Mac OS
- Solaris
- Windows

### Component list

#### Server

- BigFix Console
- BigFix Server
- BigFix WebUI Service

#### Agent or client

- BigFix Agent
- BigFix Relay

### Capabilities

#### Prerequisites

- Databases

#### Related Software

- Databases
- Identity Management
- LDAP Servers
- Virtualization Management
- Web Browsers

# Operating Systems

The Operating systems section specifies the operating systems that BigFix Platform 9.5.15 supports, organized by operating system family.

## Operating system families

[AIX](#)   [Linux](#)   [Mac OS](#)   [Solaris](#)   [Windows](#)

### Component support

- Full
- Partial
- None

## AIX

### Summary

Operating system	Operating system minimum	Hardware	Bitness	Product minimum	Components  	Notes?
<a href="#">AIX 6.1</a>	TL4	POWER System - Big Endian	64-Exploit	9.5.0	<input type="radio"/> <input checked="" type="radio"/>	Yes
<a href="#">AIX 7.1</a>	Base	POWER System - Big Endian	64-Exploit	9.5.0	<input type="radio"/> <input checked="" type="radio"/>	Yes
<a href="#">AIX 7.2</a>	Base	POWER System - Big Endian	64-Exploit	9.5.0	<input type="radio"/> <input checked="" type="radio"/>	Yes

## AIX 6.1 POWER System - Big Endian

**Legend:**  Supported  Not supported

### Component

#### Server

-  BigFix Console
-  BigFix Server
-  BigFix WebUI Service

#### Agent or client

-  BigFix Agent
-  BigFix Relay

### Product Support for the Operating System Technology Levels, Current and Future [↗](#)

Deployment unit	Component	Bitness	Base	TL1	TL2	TL3	TL4	TL5	TL6	TL7	TL8	TL9	↗
Agent or client	BigFix Agent	64-Exploit					 (1)	 (1)	 (1)	 (1)	 (1)	 (1)	
	BigFix Relay	64-Exploit											

## AIX 7.1 POWER System - Big Endian

**Legend:** Supported Not supported

### Component

#### Server

- BigFix Console
- BigFix Server
- BigFix WebUI Service

#### Agent or client

- BigFix Agent
- BigFix Relay

### Product Support for the Operating System Technology Levels, Current and Future [↗](#)

## Linux Notes

1. Includes support for RedHat and Unbreakable Kernel.

2.

OS Version	Power Version	Power Mode
Ubuntu 16.04 LTS	Little Endian Power 8	Power 8

3.

Kernel version	H/W:
Kernel version 4.142	Raspberry Pi 3, or later

4.

OS Version	Power Version	Power Mode	Product Minimum
SUSE 10 Big Endian	Power 6	Power 6	9.5.0
SUSE 11 Big Endian	Power 7	Power 7	9.5.0
	Power 8	Power 8	9.5.0
	Power 9	Power 8	9.5.11
SUSE 12 Little Endian	Power 8	Power 8	9.5.3
	Power 9	Power 9	9.5.11
SUSE 15 Little Endian	Power 9	Power 8	9.5.14
	Power 9	Power 9	9.5.14

5. kernel-2.6.32-516.el6 is the minimum prerequisite level.

6.

OS Version	Power Version	Power Mode
RHEL Server 6 - Big Endian	Power 7	Power 6/Power 6+
RHEL Server 6 - Big Endian	Power 8	Power 8
RHEL Server 7 - Big Endian	Power 7	Power 7
RHEL Server 7 - Big Endian	Power 8	Power 8
RHEL Server 7.1 - Big Endian	Power 8	Power 8
RHEL Server 7.2 - Big Endian	Power 8	Power 8
RHEL Server 7.5 - Big Endian	Power 9	Power 9

7. As of Platform 9.5.7, support is included for deploying BigFix Agent / Relay (where supported) with SELinux enabled on CentOS and RedHat versions 6, 7 and 8.

8. This operating system is no longer in service. If you need further assistance, refer to: [https://hclpnpsupport.hcltech.com/csm?id=kb\\_article&sysparm\\_article=KB0010420](https://hclpnpsupport.hcltech.com/csm?id=kb_article&sysparm_article=KB0010420)

# Hypervisors

The Hypervisors section specifies the hypervisors that BigFix Platform 9.5.15 support.

**Component support**

- Full
- Partial
- None

## Installable software

Operating System Families

[AIX](#)   [Linux](#)   [Mac OS](#)   [Solaris](#)   [Windows](#)

All BigFix components are supported on virtual hardware. Any hypervisor technology specified may be used as long as the guest OS is supported by the installed BigFix component as indicated in the OS sections of this compatibility matrix. See Supported Software tab - Virtualization Management for supported Hypervisor Agents.

## AIX

### Summary

Hypervisor	Product minimum	Components  	Guest operating system restriction?	Notes?
IBM PowerVM Hypervisor (LPAR, DPAR, Micro-Partition) any supported version	9.5.13	<input checked="" type="radio"/> <input checked="" type="radio"/>	Yes	Yes
WPAR: Product installed in System Workload Partition AIX 6.1	9.5.13	<input checked="" type="radio"/> <input checked="" type="radio"/>	Yes	Yes

## IBM PowerVM Hypervisor (LPAR, DPAR, Micro-Partition) any supported version

**Legend:**  Supported  Not supported

## Databases Notes

1. Ships with MS-SQL Server 2016 SP1 Evaluation for trial purposes. For Windows environments, Customer will provide full version of MS-SQL Server 2008, 2012, 2014, 2016 or 2017. For Linux environments, DB2 Workgroup Server Edition 10.5 is provided. Note: Ensure that the SQL collation of the database is not case sensitive.

-  BigFix Agent
-  BigFix Relay

### Product Support for the Supported Software Maintenance Levels, Current and Future

Deployment unit	Component	16	Future Versions, Releases	Future Fix Packs
Server	BigFix Server	 (1)		

## Web Browsers Notes

1. Browser support applies to the WebReports capability of the product. Console and Client UI are not accessed via user browser.
2. Adobe Flash Player 12 or greater needs to be installed for Internet Explorer to use many dashboards and wizards in the BES Console. It is recommended that computers running the BES Console have the latest version of Adobe Flash Player installed for Internet Explorer. - For Windows Server 2012 or later, the "Desktop Experience" must be enabled. - For Windows 7 or Windows Server 2008, the Flash player must be updated using Flash Player fixlet in Updates for Windows Applications site, or directly using Adobe site. - For Windows 8 or later, or Windows Server 2012 or later, the Flash player is a part of Windows (as "Desktop Experience") and the Flash player must be updated using Flash player fixlet in Patches for Windows site, directly using Windows Update, or using update file from Microsoft download site.

# Hardware

BigFix Platform 9.5.15 requires the following hardware organized by operating system family.

## Operating System Families

[Linux](#)   [Windows](#)

### Linux

# Glossary

---

**Bitness**

Compatibility of the product with the bit version support that is provided by an operating system. Different parts of a product might run on the same operating system but support different application bitness. For example, one part of the product might run only in 32-bit mode, whereas another might support 64-bit tolerate mode.

**31:** The product or part of the product runs as a 31-bit application in a 31-bit operating environment.

**32:** The product or part of the product runs as a 32-bit application in a 32-bit operating environment.

**64-tolerate:** The product or part of the product runs as a 32-bit application in a 64-bit operating environment.

**64-exploit:** The product or part of the product runs natively as a 64-bit application in a 64-bit operating environment.

---

**Co-packaged**

Additional products that are included in the product package.

---

**Co-installed**

Additional products that are included in the product package and installed when the product is installed.

---

**Deployment unit**

**Deployment Structure** identifies pieces of a product that can be independently deployed onto one or more machines in a distributed infrastructure.

- The top level of the deployment structure consists of one or more deployment units. There are four possible deployment units that a product might support: Desktop, Server, Agent or client, Mobile.
- Deployment units may be further divided into deployable **components**

**Desktop** deployment unit: Part of the deployment structure intended for use by a single user, typically installed on the user desktops. Examples of desktop deployment units include development tools, administrative tools, stand-alone business applications.

**Server** deployment unit: Part of the deployment structure that can provide services to multiple clients, providing the server in a client-server architecture. Examples of server deployment units include application servers, management servers, database servers and server-based business applications.

**Agent or client** deployment unit: Part of the deployment structure that allows remote connection between software. Examples of agent or client deployment

units include agents in management system that are installed in the same tier as the managed resources, a remote application, or database clients that are installed with the software accessing the remote services.

**Mobile** deployment unit: Part of the deployment structure intended for use by a single user, typically installed on a mobile device. An example of a mobile deployment unit is a mobile application.

<b>Hypervisor</b>	A virtual machine in which a product can run on a guest operating system.
<b>Limited operating system support</b>	By default, the supported guest operating systems for a product and a hypervisor are the operating systems that are supported by both the product and the hypervisor. If a product restricts support to a subset of these operating systems, this restriction will be indicated by specifying that there is Limited Operating System Support.
<b>Operating system minimum</b>	The minimum operating system maintenance level that is required to run on the product.
<b>Prerequisite minimum</b>	The minimum maintenance level that is required for the prerequisite to work with the product.
<b>Product minimum</b>	The minimum maintenance level that is required for the product to run on the operating system, on an hypervisor, or work with a prerequisite product or supported software.
<b>Supported software minimum</b>	The minimum maintenance level that is required for the supported software to work with the product.
<b>Long Term Support Release</b>	A Long Term Support Release is a recommended product level for which support, including defect and security updates, will be provided over a specified period of time.
<b>Continuous Delivery Product</b>	A Continuous Delivery Product delivers new function to clients more frequently.
<b>Continuous Delivery Product - Long Term Support Release</b>	A Continuous Delivery Product delivers new function to clients more frequently. Since frequent releases may not be suitable for all client environments, Long Term Support Releases provide a package that will be supported for a longer period of time.
