Disclaimers

Included in this report

This report can be generated with filters applied to operating system platforms, components, and/or software capabilities. This section reflects how the report was filtered when it was generated.

Legend

- The information about this item is included in this report.
- The information about this item is not included in the report filter.

Platforms

- Linux

Component list

Desktop

- Aurora starter store (user interface)
- Management Center for WebSphere Commerce
- WebSphere Commerce Accelerator, Administration Console and Organization Administration Console

Server

- Database server
- Web server
- WebSphere Commerce customization server
- WebSphere Commerce search server
- WebSphere Commerce store server
- WebSphere Commerce transaction server
- WebSphere Commerce utility server

Capabilities

Prerequisites

- Application Servers
- Databases
- Java
- Runtime Environment
- Web Browsers
- Web Servers

Related Software

- Application Servers
- Content Servers
- Development Tools
- Integrated Application Platform
- LDAP Servers
- Message Oriented Middleware
- Reporting and Analysis

Operating Systems

The Operating sysytems section specifies the operating systems that WebSphere Commerce Professional 9.0 supports, organized by operating system familiy.

Operating system families

Linux

Component support

- Full
- Partial
- None

Linux

Summary

Operating system	Operating system minimum	Hardware	Bitness	Components	Notes?
Red Hat Enterprise Linux (RHEL) Server 7	7.3	x86-64	64-Exploit	● ●	No

Red Hat Enterprise Linux (RHEL) Server 7 x86-64

Legend: Supported Not supported

Component

Desktop

- Aurora starter store (user interface)
- Management Center for WebSphere Commerce
- WebSphere Commerce Accelerator, Administration Console and Organization Administration Console

Server

- Database server
- Web server
- WebSphere Commerce customization server
- WebSphere Commerce search server
- WebSphere Commerce store server
- WebSphere Commerce transaction server
- WebSphere Commerce utility server

Hardware

WebSphere Commerce Professional 9.0 requires the following hardware, organized by type of hardware, deployment units, or components.

Installable software

Operating System Families

Linux

Linux

Hardware	Components	Requirement	Applicable operating systems
Device Adapters	**Server** • Database server • Web server • WebSphere Commerce customization server • WebSphere Commerce search server • WebSphere Commerce store server • WebSphere Commerce transaction server	Requirement for WebSphere Commerce Production Environment Production requirements vary widely depending on many factors associated with the creation and use of your Web site. Factors such as features deployed, workload on the system, and single-tier or multi-tier deployments will affect hardware requirements. Contact your IBM representative to help determine your specific requirements for Disk space, Memory, and Processor. Minimum Requirements for WebSphere Commerce The following are minimum requirements to install and operate WebSphere Commerce on a single-tier, non-production test environment.	All supported Linux operating systems

Hardware	Components	Requirement	Applicable operating systems
	• WebSphere Commerce utility server		
Disk Space	**Server** • Database server • Web server • WebSphere Commerce customization server • WebSphere Commerce search server • WebSphere Commerce store server • WebSphere Commerce transaction server • WebSphere Commerce utility server	Diskspace - 50 GB	All supported Linux operating systems
Display	**Server** • Database server • Web server • WebSphere Commerce customization server • WebSphere Commerce search server • WebSphere Commerce store server • WebSphere Commerce	Display- Graphics capable monitor with a color depth of at least 256 colors	All supported Linux operating systems

Hardware	Components	Requirement	Applicable operating systems
	transaction server • WebSphere Commerce utility server		
Memory	**Server** • Database server • Web server • WebSphere Commerce customization server • WebSphere Commerce search server • WebSphere Commerce store server • WebSphere Commerce transaction server • WebSphere Commerce utility server	Memory - 4 GB for single component. 16 GB is preferable if all components are settled in one server.	All supported Linux operating systems
Mice and pointing devices	**Server** • Database server • Web server • WebSphere Commerce customization server • WebSphere Commerce search server • WebSphere Commerce store server	Pointer Device - Mouse or other pointing device(optional)	All supported Linux operating systems

Hardware	Components	Requirement	Applicable operating systems
	• WebSphere Commerce transaction server • WebSphere Commerce utility server		

Packaging list

WebSphere Commerce Professional 9.0 includes the following products:

Co-packaged software

Product name	Capability	Applicable Operating System Families	Notes
DB2 Advanced Workgroup Server Edition 11.1.0	Not specified	Linux	No
DB2 OEM High Capacity Add-on 11.1.0	Not specified	Linux	No
IBM Data Server Manager Enterprise Edition 2.1	Not specified	Linux	No
IBM Security Directory Suite 8.0.1	LDAP Servers	Linux	No
WebSphere Application Server 9.0	Application Servers	Linux	No
WebSphere Liberty 17.0.0.2	Application Servers	Linux	No

Co-installed software

No co-installed software products specified.

Glossary

Bitness	Compatibility of the product with the bit version support that is provided by an operating system. Different parts of a product might run on the same operating system but support different application bitness. For example, one part of the product might run only in 32-bit mode, whereas another might support 64-bit tolerate mode. **31:** The product or part of the product runs as a 31-bit application in a 31-bit operating environment. **32:** The product or part of the product runs as a 32-bit application in a 32-bit operating environment. **64-tolerate:** The product or part of the product runs as a 32-bit application in a 64-bit operating environment. **64-exploit:** The product or part of the product runs natively as a 64-bit application in a 64-bit operating environment.
Co-packaged	Additional products that are included in the product package.
Co-installed	Additional products that are included in the product package and installed when the product is installed.
Deployment unit	**Deployment Structure** identifies pieces of a product that can be independently deployed onto one or more machines in a distributed infrastructure. • The top level of the deployment structure consists of one or more deployment units. There are four possible deployment units that a product might support: Desktop, Server, Agent or client, Mobile. • Deployment units may be further divided into deployable **components** **Desktop** deployment unit: Part of the deployment structure intended for use by a single user, typically installed on the user desktops. Examples of desktop deployment units include development tools, administrative tools, stand-alone business applications. **Server** deployment unit: Part of the deployment structure that can provide services to multiple clients, providing the server in a client-server architecture. Examples of server deployment units include application servers, management servers, database servers and server-based business applications. **Agent or client** deployment unit: Part of the deployment structure that allows remote connection between software. Examples of agent of client deployment

	units include agents in management system that are installed in the same tier as the managed resources, a remote application, or database clients that are installed with the software accessing the remote services. **Mobile** deployment unit: Part of the deployment structure intended for use by a single user, typically installed on a mobile device. An example of a mobile deployment unit is a mobile application.
Hypervisor	A virtual machine in which a product can run on a guest operating system.
Limited operating system support	By default, the supported guest operating systems for a product and a hypervisor are the operating systems that are supported by both the product and the hypervisor. If a product restricts support to a subset of these operating systems, this restriction will be indicated by specifying that there is Limited Operating System Support.
Operating system minimum	The minimum operating system maintenance level that is required to run on the product.
Prerequisite minimum	The minimum maintenance level that is required for the prerequisite to work with the product.
Product minimum	The minimum maintenance level that is required for the product to run on the operating system, on an hypervisor, or work with a prerequisite product or supported software.
Supported software minimum	The minimum maintenance level that is required for the supported software to work with the product.
Long Term Support Release	A Long Term Support Release is a recommended product level for which support, including defect and security updates, will be provided over a specified period of time.
Continuous Delivery Product	A Continuous Delivery Product delivers new function to clients more frequently.
Continuous Delivery Product - Long Term Support Release	A Continuous Delivery Product delivers new function to clients more frequently. Since frequent releases may not be suitable for all client environments, Long Term Support Releases provide a package that will be supported for a longer period of time.
