HCLTech | Supercharging Progress™

AI Force

Unlocking enterprise efficiency and productivity through GenAI and Agentic AI-led service transformation

Overview

AI Force 2.0 is a GenAI and Agentic AI platform that automates and augments workflows across software and data engineering, IT operations and enterprise business processes to significantly improve and accelerate business outcomes.

The platform is powered by enterprise-grade Responsible AI, auditability and contextual intelligence bringing prompts, RAG, tools, autonomous agents, governance and multi-LLM flexibility together in one place, enabling teams to build and deploy AI-driven workflows quickly and safely.

With deep interoperability, ready-to-use accelerators and flexible deployment options, AI Force 2.0 helps CIOs, CTOs, CDOs and business leaders drive ROI from their AI investments.

Fast facts

Accelerate software development by up to
30%

Speed up legacy application modernization by up to
60%

Improve testing efficiency by up to
45%

Increase business operations productivity by
45-60%

Reduce IT issue resolution time by up to
25%

Boost data lifecycle efficiency by
25%

With AI Force 2.0, enterprises move from disconnected, manual processes to an orchestrated, automated and insight-driven workflows.
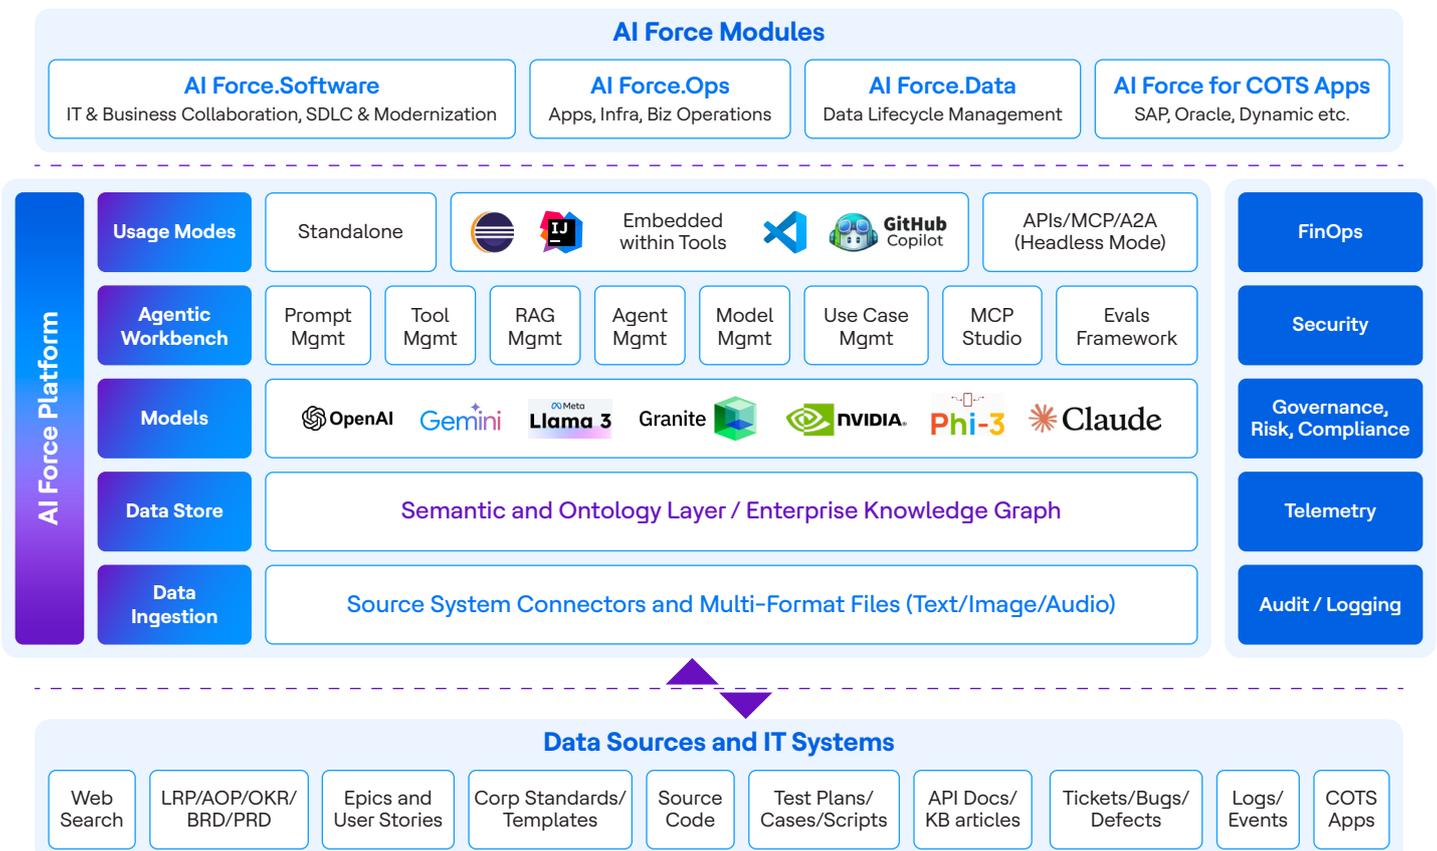

Challenge	Platform capability
Disconnected tools and fragmented workflows across engineering and operations	Unified digital thread connecting tools, data and personas across SDLC, Ops, data and enterprise applications
Siloed, unstructured data that slows decision making	Consolidated, contextualized data with AI-driven insights for faster decisions
Rapidly changing requirements leading to chaos and rework	Automated, impact-aware requirements with end-to-end traceability
Poor code quality and mounting technical debt from manual reviews	AI-assisted code generation, hardening, refactoring and continuous quality enforcement
Manual, repetitive testing cycles that delay releases	Auto-generated tests, optimized coverage and AI-driven prioritization
Slow modernization of legacy applications	Agentic modernization with automated discovery, conversion and remediation
Long deployment cycles and slow time-to-market	Accelerated, consistent releases with AI-powered DevOps automation
Limited governance and Responsible AI controls	Built-in governance, security, compliance and Responsible AI guardrails
Manual incident triage and slow root-cause resolution	AI-driven ticket intelligence, automated triage and accelerated root-cause analysis

How it works?

AI Force 2.0 brings together data, models and workflows into a unified, agentic architecture, connecting enterprise systems, enriching data with intelligence and orchestrating end-to-end workflows across diverse personas and use cases.

AI Force Modules

AI Force.Software	AI Force.Ops	AI Force.Data	AI Force for COTS Apps
IT & Business Collaboration, SDLC & Modernization	Apps, Infra, Biz Operations	Data Lifecycle Management	SAP, Oracle, Dynamic etc.

AI Force Platform

Usage Modes	Standalone	Embedded within Tools			APIs/MCP/A2A (Headless Mode)		FinOps
Agentic Workbench	Prompt Mgmt	Tool Mgmt	RAG Mgmt	Agent Mgmt	Model Mgmt	Use Case Mgmt	MCP Studio	Evals Framework	Security
Models	OpenAI	Gemini	Meta Llama 3	Granite	NVIDIA	Phi-3	Claude	Governance, Risk, Compliance
Data Store	Semantic and Ontology Layer / Enterprise Knowledge Graph							Telemetry
Data Ingestion	Source System Connectors and Multi-Format Files (Text/Image/Audio)							Audit / Logging

Data Sources and IT Systems

Web Search	LRP/AOP/OKR/ BRD/PRD	Epics and User Stories	Corp Standards/ Templates	Source Code	Test Plans/ Cases/Scripts	API Docs/ KB articles	Tickets/Bugs/ Defects	Logs/ Events	COTS Apps

Key features

- **Prebuilt out-of-the-box** assets including prompts, AI agents and use cases

- **Build-your-own** assets

  - **Prompt builder and library –** Build optimized prompts for your workflows, save them for reuse and create a centralized library for consistent automation

  - **RAG builder and library –** Design tailored retrieval pipelines to deliver context-aware responses using your enterprise data

  - **Agentic Studio –** Design, build and deploy intelligent AI agents customized for unique workflows and business goals

- **Seamlessly integrate** with existing customer tools and systems, managing connections for end-to-end automation

- **In-built observability and analytics** with the ability to track token usage, monitor system performance and gain insights into user engagement

- **Switch between multiple LLMs** based on requirements for flexibility and control

- **Built-in guardrails** for secure, compliant and Responsible AI adoption

- **Multi-tenancy** and role-based access support for collaborative enterprise environments

- Publish your own **MCP** or connect to an external one for governed and standardized model interactions for consistency and safety

Modules and user personas

AI Force 2.0 offers a suite of modules built on top of a strong foundation platform, enabling and scaling AI across diverse enterprise workflows and user personas to achieve agility, efficiency, productivity and collaboration.

AI Force .Software

Transforming the end-to-end software development lifecycle through automation, intelligence and extensibility.

Personas

Product Owner	Software Engineer
Product Manager	QA Engineer
Program Manager	DevOps Engineer
Business Analyst	Doc Writer
Application Architect	Site Reliability Engineer
UI/UX Designer	

AI Force .Ops

Transforming end-to-end IT operations through automation, intelligence and observability across hybrid cloud, digital workplace, network, cybersecurity and AMS.

Personas

IT Manager	Customer Service Agent
Systems Administrator	Fraud Detection Agent
Database Administrator	Supply Chain Manager
Service Desk Analyst	Sales Manager
Cloud Ops Agent	Finance and Accounting Manager
Computer/Storage/Backup/EUC Agent	Contract Manager
Kubernetes Engine Agent	

AI Force for SAP

Transforming SAP modernization and operations with AI-driven automation, quality and BTP-ready extensibility to accelerate migration and support.

Personas

SAP Program Manager/Solution Architect	HR/Talent Acquisition Manager
Finance Manager	Compliance Manager
Procurement Manager	Service Delivery Leader
Supply Chain Manager	

AI Force .Data

Transforming the end-to-end data lifecycle through autonomous engineering, resilient DataOps, rapid discovery and augmented insights.

Personas

Data Engineer	Data Analyst
Product Manager	Data Scientist
DevOps Manager	

Differentiators

Enterprise grade and full-stack architecture that unifies data, models and workflows delivering secure, scalable and agentic and GenAI across the entire value chain

Supports multiple deployment modes like standalone, embedded, API-based and edge and runs anywhere: on-premises, public/private cloud or hybrid environments

Co-exists and integrates with existing customer tools while connecting to enterprise data sources to unify requirements, source code, test plans, API documentation and tickets

Delivers optimized inference costs through efficient model execution and resource utilization, ensuring high performance at lower operational expense

Pre-built use cases and AI agents that enable quick adoption, complemented by specialized modules like AI Force.Software, AI Force.Ops, AI Force.Data and AI Force for SAP to streamline diverse enterprise workflows

LLM-agnostic with the flexibility to choose any commercial, open-source or proprietary LLMs, SLMs such as Gemini, LLaMA2, Phi-3, OpenAI and AWS Bedrock Claude for powerful generative and predictive capabilities

Modular architecture that enables deployment of selected components without monolithic constraints

DIY capability that empowers enterprises to build custom use cases and AI agents, enabling tailored solutions for unique business needs

Customer context aware by aggregating enterprise data into a NoSQL/vector database with embeddings, powered by OpenSearch and leveraging Retrieval-Augmented Generation (RAG) to enable semantic understanding and build knowledge graphs

Built-in governance and compliance that ensures adherence to enterprise policies and regulatory standards, delivering secure, auditable and trustworthy AI operations
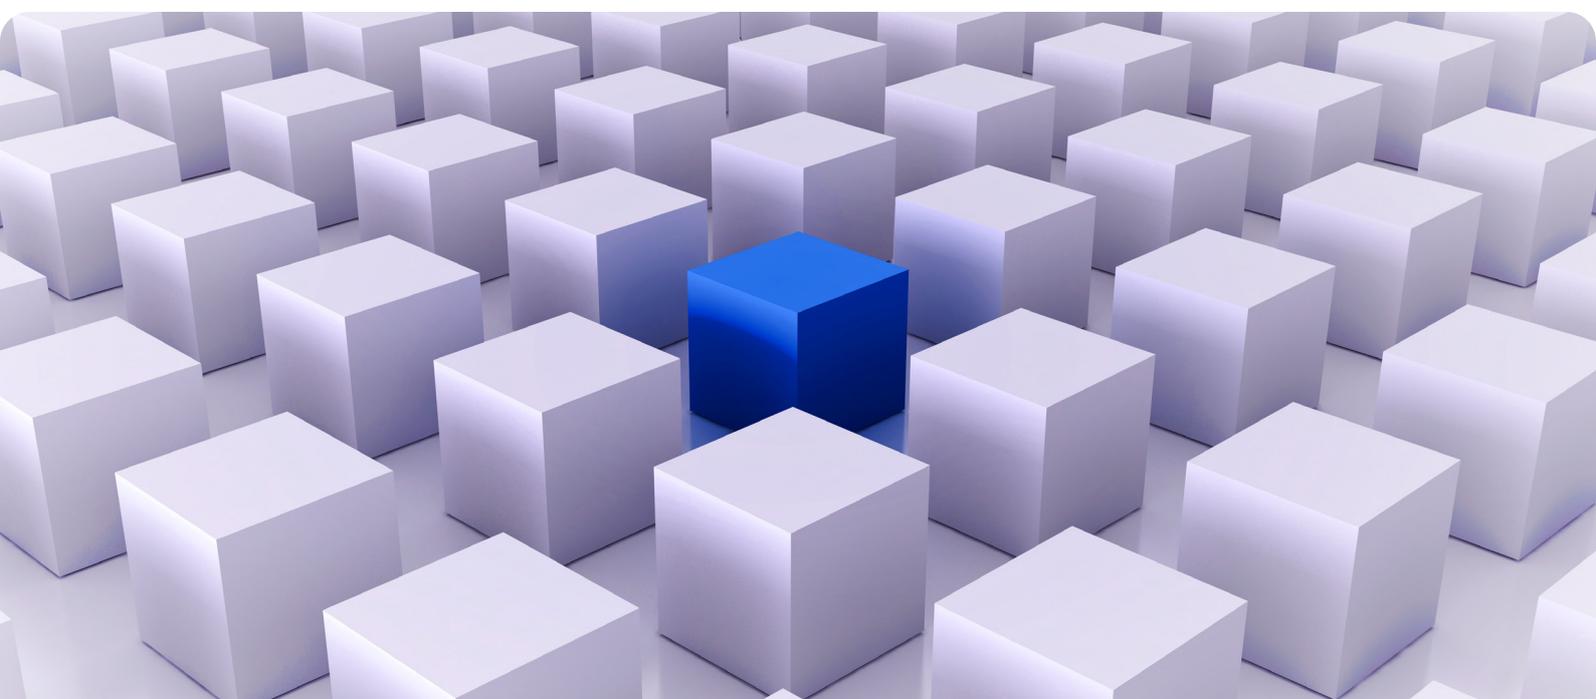

AI Force in action

⚙ **AI Force accelerates support automation for a leading social media platform**

The challenge

Manual duplicate task identification and clustering relied on keyword searches and human intervention, resulting in slow resolution, inefficiencies and time-consuming cross-platform testing.

The solution

HCLTech deployed AI Force platform to deliver context-aware duplicate detection, intelligent task clustering, automated task enrichment and AI-driven cross-platform prediction.

The impact

~77% improvement in duplicate ticket identification efficiency with a significant reduction in clustering and bug summarization, faster triaging and resolution.

AI Force powered sentiment analyzer for large-scale game review intelligence
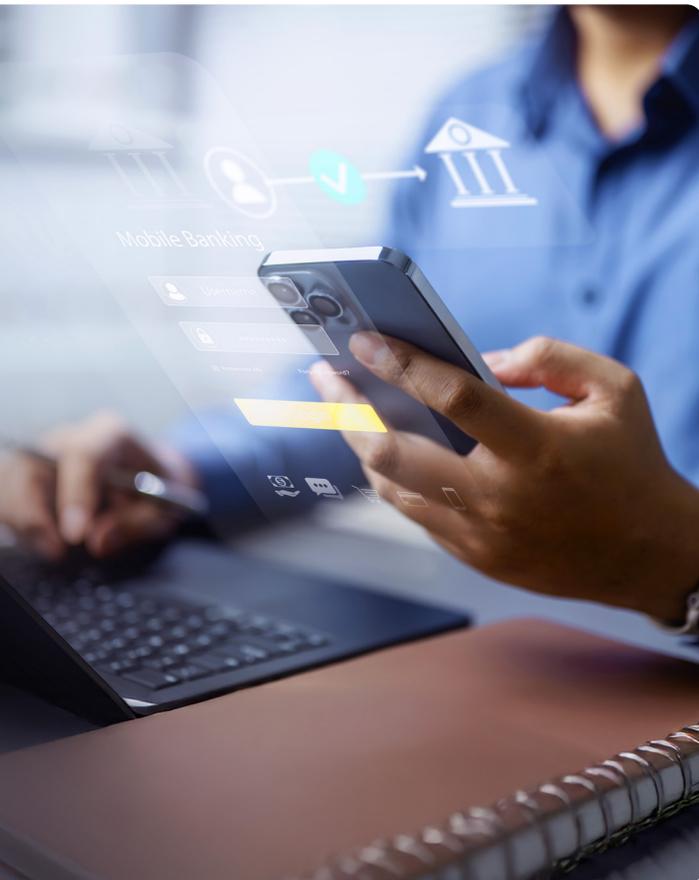

The challenge

Manual collection and analysis of game reviews across multiple sources caused delays, inefficiencies and errors, limiting the client's ability to act on player sentiment at scale.

The solution

HCLTech delivered AI Force powered sentiment analyzer with automated data ingestion, continuous analysis and a highly trained AI model to generate accurate insights at scale.

The impact

119% increase in game reviews analyzed and **60%** of incident management reports were generated from sentiment analyzer.

Modernizing a large-scale API ecosystem with AI Force enabled acceleration for a leading Australian bank

The challenge

The bank operated a vast, fragmented API landscape spanning multiple platforms. Deploying AI Force required overcoming security constraints, licensing gaps and heavyweight deployment limitations within a tightly governed network.

The solution

HCLTech adapted AI Force through secure whitelisting, custom licensing mechanisms and containerized deployment, enabling automated discovery, dependency mapping and accelerated modernization across the API estate.

The impact

31–38% improvement in team productivity with **31–35%** hard cost savings driven by AI Force adoption. Automated documentation was published directly to repositories along with auto-generated application code and unit test cases at scale.

Trusted by industry leaders

"At its core, HCLTech's AI Force features extensibility, modularity and flexibility. It can integrate smoothly with existing IT environments, be leveraged for a large variety of use cases within an enterprise and be deployed, consumed and priced in different ways that are suitable to an individual customer's business needs."

TBR

"It has strengthened its market position and enhanced client engagement due to the increased adoption of its flagship AI IPs, driven by the success of AI Force among over multiple clients."

Everest Group®

Everest AI and GenAI Service PEAK

"Platform that uses AI accelerators to augment, accelerate and improve the quality and efficiency of the SDLC and ITOps."

HFS *horizons*

HFS Horizons: Generative Enterprise Services

"It has also built the HCLTech AI Force suite of solutions, which supports enterprises across critical business domains, including software development (code generation, debugging, summarization and change impact analysis), customer support (knowledge article generation, cognitive searching, ticket triaging and resolution) and bot creation (Gen AI-driven RPA, intelligent automation and process mining agents)."

HCLTech | Supercharging Progress™

About HCLTech

HCLTech is a global technology company, home to more than 226,300 people across 60 countries, delivering industry-leading capabilities centered around AI, digital, engineering, cloud and software, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, High Tech, Semiconductor, Telecom and Media, Retail and CPG, Mobility and Public Services. Consolidated revenues as of 12 months ending December 2025 totaled $14.5 billion. To learn how we can supercharge progress for you, visit **hcltech.com.**
