

# Hardware Requirements Report

HCL Workload Automation 10.1 Fix Pack 5 requires the hardware listed below. Requirements are organized by type of hardware, deployment units, or components:

- [AIX on page 1](#)
- [IBM i on page 1](#)
- [Linux on page 2](#)
- [Windows on page 2](#)
- [z/OS on page 3](#)

**Note:** HCL Workload Automation Agent is also known as z-centric agent.

## AIX

**Table 1. Hardware requirements for AIX operating systems**

Component	Disk Space		Memory usage per component
	Installation directory	Temporary Directory	
Dynamic Agent	600 MB	250 MB	1 GB
HCL Workload Automation Agent	600 MB	250 MB	1 GB
Fault-Tolerant Agent	900 MB	400 MB	1 GB

## IBM i

**Table 2. Hardware requirements for IBM i operating systems**

Component	Disk Space		Memory
	Installation directory	Temporary Directory	
Dynamic Agent	800 MB	750 MB	1 GB
HCL Workload Automation Agent	600 MB	1 GB	1 GB

## Linux

**Table 3. Hardware requirements for Linux operating systems**

Component	Disk Space		Memory
	Installation directory	Temporary Directory	
Dynamic Workload Console	2 GB  <b>Note:</b> In addition to the above disk space, the installation requires further 579 MB on <code>/usr</code> file system.	800 MB	<ul style="list-style-type: none"> <li>• Required: 4 GB</li> <li>• Recommended: 8 GB</li> </ul>
Dynamic Agent	600 MB	250 MB	1 GB
HCL Workload Automation Agent	600 MB	250 MB	1 GB
Fault-Tolerant Agent	720 MB	350 MB	1 GB
Master Domain Manager	1,5 GB  <b>Note:</b> In addition to the above disk space, the installation requires further 579 MB on <code>/usr</code> file system.	800 MB	<ul style="list-style-type: none"> <li>• Required: 4 GB</li> <li>• Recommended: 8 GB</li> </ul>
File Proxy	400 MB	N/A	<ul style="list-style-type: none"> <li>• Required: 1 GB</li> <li>• Recommended: 2 GB</li> </ul>

## Windows

**Table 4. Hardware requirements for Windows operating systems**

Component	Disk Space		Memory
	Installation directory	Temporary Directory	

**Table 4. Hardware requirements for Windows operating systems (continued)**

Component	Disk Space		Memory
Dynamic Workload Console	2,5 GB	1 GB	<ul style="list-style-type: none"> <li>• Required: 4 GB</li> <li>• Recommended: 8 GB</li> </ul>
Dynamic Agent	800 MB	400 MB	1 GB
HCL Workload Automation Agent	800 MB	400 MB	1 GB
Fault-Tolerant Agent	700 MB	350 MB	1 GB
Master Domain Manager	2 GB	1 GB	<ul style="list-style-type: none"> <li>• Required: 4 GB</li> <li>• Recommended: 8 GB</li> </ul>
File Proxy	400 MB	N/A	<ul style="list-style-type: none"> <li>• Required: 1 GB</li> <li>• Recommended: 2 GB</li> </ul>

**z/OS****Table 5. Hardware requirements for z/OS**

Component	Total DASD Space
Agent for z/OS	500 Trks
